Company Profile

13+ Years Focus on Security Equipment OEM/ODM Manufacturer

SHENZHEN TOPPER VISION LTD established in 2013, is a professional engaged in the research, development, sale and service of CCTV camera, recording, security equipment.

We holds a professional technology-developing team dedicated in software, hardware researching and project. Factory equipped with advanced production test machine, established perfect QC department, "pursuing high quality with perfect service "is our concept of quality, we has got CE, FCC, RoHS and ISO certificates.

"Reputation First, Customers Foremost" is the aim of our service. We sincerely hope to established long-term relationship with any customer all over the world!

One-stop Customization Servicer

What can we do for you?

- * Professional security CCTV /AIOT solution service
- * Security products customized development
- * APP customization, cloud storage solution
- * Logo / UI packing design customization
- *SKD/OEM/ODM support for your branding
- *Competitive distributor pricing
- *Marketing materials & launch support

PRODUCTS RANGE

- * CCTV Professional security camera (AI POE IPC,AHD)
- * Professional AI NVR/XVR/HVR and KIT
- *AOV 4G &Wi-Fi surveillance system
- *Professional coaxial analog camera* SKD security products

Factory Environment

Barcode-reading cameras

1 → Multi-Camera Monitoring: "One-to-Many" Barcode Scanner Setup

Traceability solutions for items in warehousing, logistics, and other scenarios

Barcode Scanner + Video Integration Solution

More than cameras: barcode traceability video & smart monitoring.

Step1:
bar-code scanner

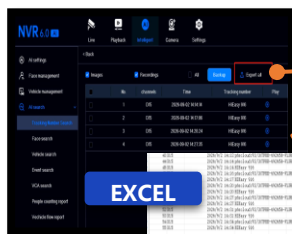

Step2:
bar-code number
overlaid onto all channel
camera

Step3:
Item traceability

Step4:
Complete video coverage,
full-process tracing.

Step5:
Date Analysis

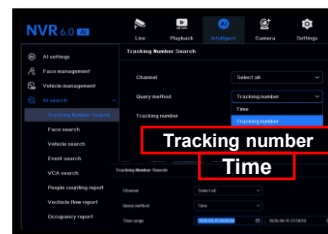

AI intelligent
Detection Monitoring

Data Export and Quick Statistical
Analysis

Rapid, accurate traceability with
clearly visible tracking history

Multiple Search Methods:
Time or Bar-code number

Full Traceability, Scan to Trace, Watch to Secure

When a single barcode is scanned, the barcode data is
automatically overlaid onto the corresponding video channel.

- Once a shipment's barcode is scanned, the tracking number is automatically overlaid onto all associated video channels, enabling end-to-end visual traceability of the goods.
- Supports both automatic and manual barcode scanners, enabling coverage of areas such as warehouse entrances, packing stations, and storage zones.

Barcode Scanner+Video Integration Solution

Solution Product Selection

Compatible with existing systems for unified management

Support upgrade of the old system

Replace NVR

Add barcode-reading cameras

Maintain compatibility with existing surveillance system

Scan for Traceability

Safety Monitoring

Camera and NVR products selection

IPC Camera Features:

5MP@30FPS HD Resolution

Support ONVIF, GB28181, RTMP

Metal Camera Housing

Support Two-Way-Talk

Support 512G TF Card Storage

Dual light LED board, Smart alarm

AI human&vehicle detection, Electronic Fence, Line Crossing detection, Off-post detection, People counting

NVR Features:

10/16/36CH NVR

Full channel 4K IPC access,

Support 1/2/4/8 SATA HDD, Metal Housing

Support face recognition/detection and structured algorithm, AI detection, Electronic Fence, etc.

POE NVR Features:

4/8/12/16CH POE NVR

Full channel 4K IPC access,

Support 1/2 SATA HDD, POE PNP, Metal Housing

Support face recognition/detection and structured algorithm, AI detection, Electronic Fence, etc.

AI BOX for CCTV Installation

Integrated video Analytics Package

Turn Your CCTV into an AI-Smarter Surveillance

CCTV Sees the World, AI Brings it to Life.

This is not just a CCTV system,
It is a smarter, more powerful solution
with **AI-based video analytics**

AI EDGE BOX

AI-Powered

Existing CCTV

**Detects events,
but doesn't take action.**

> RBC

- × Requires 24/7 manual monitoring
- × High risk of missing important events
- × Lack of prompt response and action

AI EDGE BOX

**Detects in real time,
alerts immediately.**

INTRUSION DETECTED

Ideal for Various Industries: Public facilities, Schools, Retail stores, Smart factories, etc.

GSM Call Alert IP Camera System

IP Camera Still Alerts Even Without Network

Equipped with GSM phone dialing, the surveillance system triggers real-time alerts and calls to enable immediate response even without network.

With GSM Dial-up System Camera

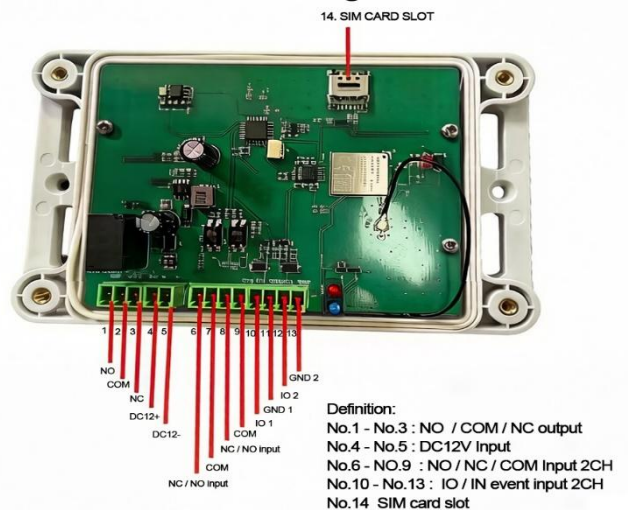

Support 2G 3G 4G 5G GSM card

Support NC/NO and I/O alarm input

Support for setting the detection time

Auto-Dial 3 Numbers if no any answer

True WDR(120db), color night
Alarm, audio, MicroSD card optional

Face Recognition

Features:
Face comparison functionality, Fast snapshot,
Whitelist/Blacklist, visitor access, stranger alarm
Output of personnel feature values, mask, age etc.
Detecting and tracking up to 6 faces per frame

License Plate Recognition

Features:
High-end ISP video SOC,
Built in AI detection of large models
Support global license plate capture or recognition

Fire Detection

Features:
One Camera Two Function,
No flame-24 hours monitoring and on duty anti-theft,
Flame -detect the flame and send alarm in time

People Counting

Features:
Smart Capacity Alert :Triggers alarms when the occupancy personnel is lower or higher than the preset value.
